

Action Plan

Grantee: Louisville Jefferson County Metro Government, KY

Grant: B-08-MN-21-0001

Grant Amount: \$ 6,973,721.00

Status: Reviewed and Approved

Funding Sources

No Funding Sources Found

Narratives

Disaster Damage:

Jefferson County ranks highest among the Commonwealth of Kentucky's 120 counties and the Louisville MSA has been identified as the area with greatest need for assistance to reduce the number of foreclosures (according to the Kentucky Office of the Courts. Louisville/Jefferson County Metro Government (Louisville Metro) ranks highest among statewide jurisdictions with the greatest likelihood of future foreclosure, abandonment and deterioration. According to the Foreclosure and Abandonment Risk scores furnished by HUD, when aggregated to the county level, Louisville Metro was the only county assigned a most distressed score of 100 out of 100 points by the Kentucky Department for Local Government.

Recovery Needs:

In preparation for receiving the NSP special allocation, Louisville Metro established a housing policy Advisory Panel to gather input from the private sector, external Metro Government agencies, and the Louisville Metro Council. Financial institutions, housing development professionals and supportive service providers were each represented on the panel. Four subcommittees were formed to evaluate the topics such as financial leveraging opportunities, geographical need, residential construction challenges, and homebuyer concerns. The programmatic activities and priorities reflected in this amendment are a direct result of the conclusions and recommendations of the Advisory Panel based on information gathered by and for the panel.

To ascertain areas of greatest need, Metro Louisville analyzed data from a number of sources. The HUD USER website assessed need using a variety of factors including home value decline, incidence of high cost loans, and Post Office data on residential vacancies. We consider areas of greatest stress to be those Census Tract Block Groups which received the designation of "A", "B", and "C" on a scale of 1 to 10 (with 10 indicating the greatest degree of distress). Louisville Metro's primary emphasis will be on those rated "A" by US HUD. The Metro Department of Inspections, Permits and Licenses (IPL) also provided information regarding the length of vacancy and citations for Code violations for vacant structures; and the Master Commissioner of Jefferson Circuit Court provided information on foreclosures throughout Metro Louisville. In addition to addressing areas of greatest need, the Advisory Panel also considered other neighborhood characteristics. Specific areas of priority were chosen based on the following: •Existing Neighborhood Plan or infrastructure plan •Existing neighborhood involvement, e.g. Block Watches, Weed and Seed •Potential economic development corridors, which create or could create jobs •Neighborhood assets and amenities, e.g. parks, playgrounds, schools •Owner-occupancy rate and trends •Vacancy rates, from the Department of Inspections, Permits and Licenses •Foreclosure information from Metro 211 program which was established to counsel people in foreclosure crisis •Housing value trends from the Property Valuation Administrator.

Based on the best available information, the Advisory Panel prioritized neighborhoods suffering disproportionate levels of foreclosure stress and deterioration of the existing housing stock. Data provided by US HUD is based on Census Tract boundaries which do not always correspond with commonly recognized neighborhood boundaries. Louisville Metro was able to overlay high risk Census Tracts on a map of the jurisdiction to identify the most closely correlated neighborhoods. Neighborhoods designated as high priority areas receiving initial benefit from NSP and other available entitlement funds are include: Park duValle area (Census Tracts 10, 127.01, and 128.01); Shawnee (Census Tracts 4 and 7); Newburg (Census Tracts 113.01, 114.04, 114.05 and 114.06); and Smoketown/Shelby Park (Census Tracts 62 and 65). Using information from local governmental sources, all vacant properties in these areas will be mapped and determinations will be made on whether individual properties are consistent with NSP eligible use requirements and local government objectives. Louisville Metro will move ahead with an ongoing assessment of the specific needs of each neighborhood.

Recognizing the unique programmatic opportunities that each neighborhood presents will necessarily yield neighborhood specific strategies comprised of the eligible uses brought forth in the NSP by HERA. The NSP allows the use of only the low-and-moderate income national objective. All funds will be used to assist individuals or families with incomes at or below 120 percent of area median income (AMI). In addition, no less than 25 percent of funds (\$1,743,430) will be used to purchase or redevelop abandoned or foreclosed residential properties that will be used to house individuals or families at or below 50 percent of AMI. Louisville Metro will target NSP funded activities into areas of greatest need as stipulated in HERA. Efforts to identify the specific areas of greatest need were informed by analyzing data made available by the Office of Policy Development and Research's HUD USER. Toward making determinations of greatest need, Louisville Metro has adopted the "Estimated Foreclosure Abandonment Risk Score." These Risk Scores incorporate factors such as the percentage of home foreclosures, the percentage of homes financed by subprime mortgages, and residential vacancy rates. After reviewing Risk Scores for all Census Tract Block Groups within the jurisdiction Louisville Metro defines areas of greatest need to be those Block Groups which received a Risk Score of "A", "B", or "C" on a scale of 1 to 10 (with 10 indicating the greatest degree of future foreclosure risk and abandonment). The areas of greatest need to be targeted with NSP funds are the Park duValle area (Census Tracts 10,

127.01, and 128.01); Shawnee (Census Tracts 4 and 7); Newburg (Census Tracts 113.01, 114.04, 114.05 and 114.06); and Smoketown/Shelby Park (Census Tracts 62 and 65).

Each Target Area will be further analyzed and Metro will explore defining smaller project areas based on our ability to concentrate programmatic efforts and achieve sustainable outcomes for the residents in the immediate area. Detailed strategies will be determined on a neighborhood-by-neighborhood basis, at the street level, in collaboration with neighborhood leaders and Metro Council representatives.

The initial proposed budget for NSP activities included \$697,372 for Direct Disposition (10%), \$1,394,744 for Direct Acquisition (20%), \$1,743,430 for Indirect Finance (25%), \$1,743,430 for Indirect Production (25%), and \$697,372 for Indirect Public Facilities (10%). Louisville Metro will utilize no more than 10% (\$697,372) of its NSP allocation for Administration.

As of the second quarter Louisville Metro wishes to revise the NSP budget and eliminate the "Direct Disposition" or Landbanking activity under Eligible Use C in favor of consolidating all direct activities under Eligible Use B "Purchase and Redevelop Foreclosed Properties". Funding allocated under Use B will be utilized for a consumer- driven purchase-resale program, where income eligible, potential NSP homebuyers will have an opportunity to select a foreclosed property, located in any one of the fourteen NSP Census Tracts, and to have that property renovated on their behalf. Working with potential NSP homebuyers early on in the redevelopment process provides many benefits to Metro and to the homebuyer. The program will allow the homebuyer will be amply involved throughout the renovation process and to become intimately familiar with the property before taking ownership. Metro would also benefit from quickly obligating NSP funds to cover acquisition, counseling fees, construction costs, downpayment assistance, and principle write downs; and doing so without the risk of associated with purely speculative redevelopment. Preference will be given to families in the 50% AMI income category and outcomes will be counted toward the low-income set aside requirement. The proposed Action Plan revision reflects a total of \$2,092,116.00 allocated to this program under Eligible Use B.

After receiving the final NSP Bridge Notice and having attended the NSP-1 Training in Chicago, IL July 6-7, 2009, Louisville Metro is better informed on actual activities allowed under each of the eligible use categories. With this understanding, we have also eliminated line items set aside for Eligible Use A "Financing Mechanisms, as downpayment grants, principle write downs, or development subsidies can be realized under Uses B or E. The final Action Plan budget reflects only two "Projects" crossing three eligible use types available in DRGR. Funding under Use E (\$4,184,233) will be reserved for the developer request for proposals. Project specific "Activities" were added with zero balances as we anticipate potentially using funds for acquisition of residential properties, acquisition of non-residential properties, rehabilitation, new construction, and demolition to complete site specific projects. Finally, Metro will explore the "lump-sum draw down" provisions found at 24 CFR 570.513 to expedite the obligation and expenditure of NSP funds.

Non-NSP resources will be used for educating and informing residents about redevelopment opportunities presented through HERA and local government's efforts under the NSP. Louisville Metro also reserves the right to revise this plan and/or reprogram NSP funds, as appropriate, subject to the alternative requirements governing citizen participation.
